

3600W PowerVerter APS 36VDC 230V Inverter/Charger with Auto-Transfer Switching, Line-Interactive AVR

MODEL NUMBER: **APSINT3636VR**

Highlights

- Delivers clean 230V AC power from AC or DC power source
- 3600W continuous output power; 7200W peak power
- Auto-transfer switching option for UPS operation
- Corrects brownouts and overvoltages without using battery power
- Includes Tripp Lite [APSRM4](#) remote control module

Package Includes

- APSINT3636VR 3600W PowerVerter APS 36V DC 230V AC Inverter/Charger
- [APSRM4](#) remote control module
- Owner's manual

Description

The APSINT3636VR 3600W PowerVerter APS 36V DC 230V AC Inverter/Charger is a reliable power source for a wide variety of equipment ranging from power tools, pumps and portable lighting to laptop computers and sensitive monitoring equipment. With no fumes, fuel or excess noise, it's an excellent alternative to generator power.

The DC-to-AC inverter features an automatic line-to-battery transfer switch and integrated charging system that allow it to work as a vehicle inverter, standalone AC power source or extended-run UPS. It delivers 3600W of continuous power, 5400W up to one hour or 7200W of peak power up to 10 seconds during equipment startup or cycling. An automatic overload detector, cooling fan and resettable AC circuit breakers protect the unit from damage.

Designed for easy installation in RVs, commercial and fleet vehicles, emergency vehicles and construction equipment, the APSINT3636VR converts stored power from any 36V battery or automotive DC source to safe, stable, computer-grade AC power for unlimited runtime. When hardwired to an external 230V AC source, the unit keeps the user-supplied battery charged via a three-stage 7.5/30A selectable charging system while simultaneously delivering AC power to connected equipment.

When used as a UPS, the APSINT3636VR's automatic voltage regulation feature protects your equipment against blackouts, brownouts, surges and line noise. Tripp Lite's [APSRM4](#) module with "traffic light" LEDs is included to provide complete remote monitoring and control of the unit.

Features

Reliable Power for Mobile, Emergency and Remote Sites

- Generates safe, stable, computer-grade 230V AC power from 36V battery bank
- Ideal for powering tools, saws, motors, pumps, portable lighting, appliances and computer equipment in heavy-load conditions
- Designed for easy installation in RVs, commercial and fleet vehicles, emergency vehicles and construction equipment
- Functions as a vehicle inverter, standalone AC power source or extended-run UPS
- Unlimited runtime with variety of user-supplied batteries

Meets Normal and Peak Power Demands

- 3600W of continuous power
- 5400W of reserve power up to 1 hr.
- 7200W of peak power up to 10 sec. to accommodate surge power demands during equipment startup and cycling
- Automatic overload detector, built-in cooling fan and resettable AC circuit breakers protect unit from damage
- High-current DC input terminals for simple hardwired installation

Automatic Voltage Regulation

- Corrects brownouts and overvoltages without using battery power during battery charging and UPS standby modes
- Protects against line noise that can damage equipment or cause data loss

Automatic Transfer Switching

- Transfer relay switches to inverter power during blackout in 20 ms
- 3-position switch enables Auto, Charge Only or System Off mode
- DIP switches configure high and low voltage auto-transfer

3-Stage 7.5/30A Selectable Battery Charger

- Serves as battery charger when external 230V AC power is supplied and powering connected equipment
- Protects battery from overcharging and overdischarging
- Low-battery protection prevents excessive battery depletion
- DIP switches configure wet/gel charging profiles

Remote Control Capability

- Included Tripp Lite [APSRM4](#) remote control module provides remote monitoring and control of unit

Front-Panel LEDs

- Indicate AC/DC operational modes, overload status, DC voltage level, shutdown status and system fault status

Rugged Polycarbonate Housing

- Resists moisture, vibration and impact
- Mounts on any rigid horizontal surface

Specifications

OUTPUT	
Frequency Compatibility	50 Hz
Output Receptacles	Hardwire
Output (Watts)	3600
Continuous Output Capacity (Watts)	3600
Peak Output Capacity (Watts)	7200
Output Nominal Voltage	230V

Tripp Lite
1111 W. 35th Street
Chicago, IL 60609 USA
Telephone: 773.869.1234
www.tripplite.com

Output Voltage Regulation	LINE POWER (AC): Maintains 230V nominal sine wave output from line power source. INVERTER POWER (AC): Maintains PWM sine wave output voltage of 230 VAC (+/-5%).
Output Frequency Regulation	50 Hz (+/- 0.3 Hz)
Overload Protection	Includes 12A input breaker dedicated to the charging system and 20A output breaker for AC output loads.
Pure Sine Wave Output	No
INPUT	
Nominal Input Voltage(s) Supported	230V AC
Recommended Electrical Service	DC INPUT: Requires 36VDC input source capable of delivering 114A for the required duration (when used at full continuous capacity - DC requirements increase during OverPower and DoubleBoost operation). For automotive applications, professional hardwire installation with 300A minimum battery system fusing is recommended.
Maximum Input Amps / Watts	DC INPUT: Full continuous load - 114A at 36VDC. AC INPUT: 26 amps at 230VAC with full inverter and charger load (10.4A max charger-only / combined input load to support charger and AC output is automatically controllable to 66%-33%-0% based on AC output loading using the charger limiting set points - see manual for setting instructions)
Input Connection Type	DC INPUT: Set of DC bolt-down terminals. AC INPUT: Hardwire via built in junction box with cover plate
Voltage Compatibility (VAC)	230
Voltage Compatibility (VDC)	36
BATTERY	
Expandable Battery Runtime	Runtime is expandable with any number of user supplied wet or gel type batteries
DC System Voltage (VDC)	36
Battery Pack Accessory (Optional)	98-121 sealed lead acid battery(optional)
Battery Charge	30-amp high/7.5-amp low
Expandable Runtime	Yes
VOLTAGE REGULATION	
Voltage Regulation Description	Includes automatic voltage regulation to correct brownouts and over-voltages back to usable levels
Overvoltage Correction	Over-voltages are automatically reduced by 10%
Brownout Correction	Brownouts are automatically boosted by 10%
USER INTERFACE, ALERTS & CONTROLS	
Front Panel LEDs	Set of 6 LEDs offer continuous status information on load percentage (6 levels reported) and battery charge level (7 levels reported). See manual for sequences.
Switches	3 position on/off/remote switch enables simple on/off power control plus "auto/remote" setting that enables distant on/off control of the inverter system when used in conjunction with optional APSRM4 accessory when used in inverter mode. In AC uninterruptible power mode, "auto/remote" setting enables automatic transfer from line power to battery power - to maintain continuous AC power to connected loads.
PHYSICAL	
Shipping Dimensions (hwd / in.)	13.25 x 15 x 21.13

Tripp Lite
1111 W. 35th Street
Chicago, IL 60609 USA
Telephone: 773.869.1234
www.tripplite.com

Shipping Dimensions (hwd / cm)	33.66 x 38.1 x 53.67
Shipping Weight (lbs.)	63
Shipping Weight (kg)	28.6
Unit Dimensions (hwd / in.)	7 x 8.5 x 14
Unit Dimensions (hwd / cm)	17.78 x 21.59 x 35.56
Unit Weight (lbs.)	58
Unit Weight (kg)	26.3
Cooling Method	Multi-speed fan
Material of Construction	Polycarbonate
Form Factors Supported	Mounting slots enable permanent placement of inverter on any horizontal surface (see manual for additional mounting information)
ENVIRONMENTAL	
Relative Humidity	0-95% non-condensing
LINE / BATTERY TRANSFER	
Transfer Time (Line Power to Battery Mode)	20 milliseconds (typical - compatible with many computers, servers and networking equipment - verify transfer time compatibility of loads for UPS applications)
Low Voltage Transfer to Battery Power	In AC "auto" mode, inverter/charger switches to battery mode as line voltage drops to 144V (user adjustable to 163, 182V - see manual)
High Voltage Transfer to Battery Power	In AC "auto" mode, inverter/charger switches to battery mode as line voltage increases to 259V (user adjustable to 264 - see manual)
SPECIAL FEATURES	
Load Sensing	Optional load sense function enables automatic inverter shutoff and startup as connected equipment is powered off and on. Front panel load sense potentiometer can be set to shutoff or turn on inverter power in response to loads of any level, up to 150 watts.
Remote Control Capability	Yes
WARRANTY	
Product Warranty Period (U.S. & Canada)	1-year limited warranty
Product Warranty Period (International)	2-year limited warranty
Product Warranty Period (Mexico)	2-year limited warranty
Product Warranty Period (Puerto Rico)	1-year limited warranty
