

USB-C, USB-A to RJ45 Gigabit Ethernet Network Adapter (2xM/F), USB 3.2 Gen 1, Black

MODEL NUMBER: U336-000-GB-CA

Connects your PC, Chromebook, MacBook Pro or Windows laptop to a wired Gigabit Ethernet network at 1 Gbps speeds.

Features

USB to Gigabit Ethernet Adapter Connects You to a Wired 1G Network

This USB network adapter instantly connects your computer, notebook, MacBook Pro or Windows laptop to a wired Gigabit network through either a USB-A or USB-C port. No internal Ethernet card is required. Ideal for settings in which no Wi-Fi is available or when a wired connection offers faster speeds, this USB 3.2 Gen 1 adapter lets you enjoy true 10/100/1000 Mbps Ethernet speeds for uploading and downloading large files and streaming audio/video without buffering.

Plug-and-Play Operation Gets You Online Immediately

This bus-powered network adapter requires no external power source. Just connect the built-in USB-A plug to your computer (a USB-C adapter is included for connecting a USB-C or Thunderbolt 3 port), and use a Cat6 cable (such as Tripp Lite's N201-Series) to connect the RJ45 end to a network. LEDs indicate when the adapter is connected to your computer and your computer is connected to a network.

Complies with Current IEEE Standards

The U336-000-GB-CA is compliant with IEEE 802.3, 802.3u, 802.3ab and 802.3az standards. It supports full duplex with IEEE 802.3x flow control and half duplex with back-pressure flow control, as well as 10/100/1000 auto-sensing, Wake-on-LAN and IPv4 and IPv6 pack Checksum Offload Engine (COE) to reduce CPU loading. The compact unit fits easily into a pocket, purse, backpack or laptop bag for instant file transfers where needed. It's compatible with Windows and macOS.

Highlights

- Connects you to a wired 10/100/1000 Mbps network where Wi-Fi is weak or unavailable
- More convenient, less expensive than installing or upgrading an internal Ethernet card
- Widely compatible with Windows and macOS operating systems
- LED indicates successful connection to computer and an Ethernet network
- Plug-and-play operation with no external power needed for easy, immediate installation

Applications

- Connect to a wired Gigabit Ethernet network in an office, trade show booth, lecture hall, classroom, hotel lobby or auditorium
- Extend the life of a legacy laptop or notebook computer with a failed internal Ethernet card
- Play network gaming consoles in areas without Wi-Fi capability

System Requirements

- PC, laptop or other compatible device with USB-A or USB-C port (USB 3.2 Gen 1 required to achieve USB 3.2 Gen 1 speeds)
- Windows or macOS operating system

Package Includes

- U336-000-GB-CA USB-C/USB-A to RJ45 Gigabit Ethernet Network Adapter
